PARTNERSHIP PROGRAM – EUROPE

Technical Filters was instrumental in introducing Polyimide composite filter media in Europe. Now all the leading felt manufacturers have adopted variants of this technology.

The contacts made during that era have blossomed into strong partnerships in Spain, Germany, Italy and elsewhere. Our APEX PTFE membrane filter media are enjoying strong pan European marketing, while our DURATEX PTFE fiber has a fair share in Europe.

And our exhibit at the 10th World Filtration Conference in Leipzig, Germany led to the establishment of many more marketing opportunities.

Our APEX PTFE membrane filter bags are being promoted directly to leading equipment manufacturers in cement, waste to energy and power industries. Our team is also working with leading bag fabricators, with many important trials and projects under way. We are also marketing directly to many end users where we assume direct responsibility for performance guarantees.

Our presence in Spain is long established, leading to significant progress in Glass membrane bag replacement in the cement industry.

At last count, Technical Filters has shipped goods to Austria, Germany, Italy, Finland and Spain.
