PARTNERSHIP PROGRAM – SOUTH AMERICA

Members of our team traveled extensively throughout South America in the nineties. In the Chilean copper belt, an important contact was established with Mr. Jorge Varela, who was laying down his own markers.

Now Mr. Varela has founded his own successful fabric filter engineering company. And a strong partnership has now been established, resulting in many successful projects along the length of Chile involving our APEX PTFE membranes. In Argentina, a link was made with Dr. Norberto Guberman. And again that marker has resulted in a strong partnership, resulting in a major project involving Glass PTFE membrane filter bags.

Technical Filters has shipped goods to Argentina, Bolivia, Brazil, Chile, Colombia, Honduras, Mexico and Venezuela - at last count.
